

# Quality Policy

The policy of Optimarin is to provide systems and services specialising in the treatment and purification of ballast water that are of the highest quality and in accordance with relevant laws, regulations, standards and other requirements. Our objectives are to ensure that the equipment is entirely reliable when operated, and that our supporting personnel are professional, informed, obliging and polite.

A comprehensive introduction and overview of the basis quality management system will be given to all employees, to ensure that they all fully understand the management system and the internal and external obligations. Every employee is expected to be dedicated and to comply with the high level of service that is expected as part of Optimarin's high standard of quality control.

Optimarin aims to combine products of the highest quality, with the very highest of safety standards which will never be compromised. Optimarin will always provide professional service, support and advice, using highly qualified and reliable people to ensure the timely delivery and smooth and safe installation of our system to our clients.

Continuous improvement in all aspects of our company will be a priority in order to maintain our lead position in the market as a supplier of the highest quality products in ballast water treatment systems.

Stavanger, 4<sup>th</sup> July 2016
